# NEX TECH

## NexTech Robotics is a free technology program for students in middle school, open spring 2021 online

UC Merced engineering students teach engaging curriculum, using coding activities, live demonstrations to foster a creative, peer-focused learning environment to discover:

- Programming and coding
- Hot topics in technology, like drones and sensors, and
- Skills, like teamwork and computational thinking.

This is not just another zoom session! Nor a video game! It's tested and middle-schooler approved programming to spark interest in technology.
